

PURUSHOTHAMAN D

purushothamand.dev@gmail.com | +91 8220575572 | linkedin.com/in/purushothamanmernd

Technical Skills

Languages: python (automation), JavaScript

Front-End: React.js, Next.js, React Flow, Redux, Axios ,clerk auth

Back-End: Node.js, Express.js, NestJS, JWT & OAuth, ORMs (e.g.TypeORM) MySQL, PostgreSQL, Redis

Developer Tools: GitHub, GitLab, Antigravity Code Editor, Claude Code, Postman, Chrome DevTools, DBeaver, Docker

Cybersecurity: Kali Linux, VAPT Methodology, Penetration Testing, Vulnerability Assessment

Work Experience

Finstein Advisory LLP

Oct 2024 – Present

Full-stack Developer | 2 yrs | B2B and SaaS

- Built **reusable, dynamic** React and NestJS components and modules **optimized for speed and reduced memory usage**, keeping code clean, consistent, and easy to scale across all projects.
- Implemented **OAuth 2.0** (Google, Microsoft, LinkedIn), **Twilio**, **Redis-queued mail microservice**, and **Stripe & Razorpay** payment gateways to handle authentication, communication, scalable email delivery, and subscription-based billing.
- Designed a drag-and-drop workflow builder (similar to Zapier and n8n) **using ReactFlow**, enabling security engineers to visually connect and automate VAPT tools for streamlined penetration testing workflows.
- Built an **AI agentic system** to analyze VAPT tool outputs, automatically detect vulnerabilities, and generate remediation recommendations, reducing manual effort by **50%**.
- Implemented **real-time result streaming** using **WebSockets** and **Celery + Redis** task queues to handle asynchronous execution with live visibility into ongoing security assessments.
- Integrated **VAPT tools**, **Vector Database** for semantic retrieval, and **AWS S3** for scalable storage within a **FastAPI + PostgreSQL** cybersecurity platform.
- Built a **multi-tenant medical platform** using **NestJS + PostgreSQL** with **Cornerstone.js** for medical imaging and optimized APIs to ensure reliable performance on **3G networks**.
- Implemented **enterprise-grade security standards** aligned with **FDA compliance**, ensuring robust data protection, access control, and regulatory readiness.

Personal Project

Zerohumans | FastAPI, AutoGen v0.7, Next.js 19, PostgreSQL, GraphFlow

zerohumans.in

- Designed a **GraphFlow-based AutoGen multi-agent orchestration system** where 6 AI agents execute project phases — SRS, UI/UX, Development, Testing, and Deployment — autonomously.
- Implemented **isolated per-project memory**, async priority task queue, and live activity streaming with automatic WebSocket reconnection.

Education

Dhanalakshmi Srinivasan Engineering College, Mamallapuram

Sept 2021 – May 2024

- **Degree:** Bachelor of Computer Applications (BCA)
- **CGPA:** 7.02 / 10
- **Relevant Coursework:** DBMS, Operating Systems, Software Engineering, Web Technologies, Cybersecurity Agile Software Development Life Cycle, Data Structures, Artificial Intelligence, Software Project Management

Certification

Hackathon Participation (Codukalam 5.0) – Collaborated in a 3-day hackathon to design and build a full-stack web application under time constraints.

Claude Code Certification (Anthropic) – Completed official certification demonstrating proficiency in Claude Code tools and workflows.
