

PURUSHOTHAMAN D

Full-Stack Developer | purushothamand.dev@gmail.com | +91 8220575572 | linkedin

Technical Skills

Languages: Python (OOP & DSA Fundamentals), JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, React Flow, Redux, Tailwind CSS, Axios

Backend: Node.js, Express.js, NestJS, FastAPI, Socket.IO, TypeORM, SQLAlchemy, Celery, Redis Queue

Databases: MySQL, PostgreSQL, Redis, SQLite

Cloud & Tools: AWS (EC2, S3, SES, RDS), Docker, GitHub, GitLab, DBeaver, Claude Code

Security: Kali Linux, VAPT Methodology, Penetration Testing, Vulnerability Assessment

Work Experience

Finstein Advisory LLP - Chennai, Tamil Nadu

July 2024 – April 2026

Full-Stack Developer | 1.5+ Years | SaaS & B2B Products

- Built **reusable and dynamic UI components** using **React.js** and developed scalable backend modules with **Nest.js**, optimizing performance and reducing memory usage across applications, and contributed to **end-to-end SaaS product development**.
- Developed and integrated **RESTful APIs** using **Node.js**, **Nest.js**, and **PostgreSQL**, following modular architecture, framework standards, and best practices to ensure scalability and maintainability.
- Integrated **OAuth 2.0** (Google, Microsoft, LinkedIn) for secure authentication, and implemented **Twilio** with a **Redis-queued mail microservice** for scalable communication and reliable email delivery.
- Integrated **Stripe & Razorpay** payment gateways and handled all payment flows using **webhook events** for reliable and scalable subscription billing.
- Built a **workflow automation platform** leveraging **React Flow** to create interactive drag-and-drop interfaces, and implemented an **AI agentic system** to automatically generate workflows using AI agents.
- Integrated **OpenAI** and **Gemini APIs** into applications, implementing prompt handling, response processing, and backend integration to deliver AI-driven features.
- Engineered a core **AI-powered automation pipeline** within a SaaS product using **FastAPI** and **Python**, processing high-volume terminal outputs through structured parsing, file management, and **AWS S3** integration, enabling automated analysis and reporting, reducing manual effort by **50%**.
- Built **real-time features** using **FastAPI** with **WebSockets** and **Celery + Redis**, implementing asynchronous task queues, event-driven processing, and scalable message handling for live data streaming.
- Designed and optimized **database schemas** and queries using **PostgreSQL** and **MySQL**, applying indexing, query optimization, normalization, and efficient joins to enhance performance and scalability.
- Improved **code quality** and **application security** by identifying and resolving issues using **SonarQube** and **open-source security tools**, ensuring cleaner, secure, and maintainable code.
- Built a **multi-tenant application** using **Nest.js + PostgreSQL**, designing scalable APIs and optimizing performance for low-bandwidth environments.

Education

Dhanalakshmi Srinivasan Engineering College, Mamallapuram

Sept 2021 – May 2024

- **Degree:** Bachelor of Computer Applications (BCA) – **CGPA:** 7.02 / 10
- **Relevant Coursework:** DBMS, Operating Systems, Software Engineering, Web Technologies, Cybersecurity, Agile SDLC, Data Structures, Artificial Intelligence

Certification

Hackathon Participation (Codukalam 5.0) – Built a full-stack web application in a 3-day hackathon.

Claude Code Certification (Anthropic) – Certified in Claude Code tools and workflows.

Node.js Certification (Simplilearn) – Backend development and API building fundamentals concepts.

React.js Certification (Infosys Springboard) – Building dynamic user interfaces with React efficiently effectively.
